Profitable Observations and Notes.

All Measures of Longitude are deduced from Barley Corns: Three Barley Corns make an Inch, Twelve Inches one Foot, Three Feet one Yard, Five Yards and an half one Statute-Pole, or Perch; Forty Perches make a Purlong, Eight Furlongs make an English Mile, in a Mile are Three hundred and twenty Perches or Poles, One thousand fifty six Paces: Ells, One thousand four hundred and eight: Yards, One thousand seven hundred and sixty: Feet, Five thousand two hundred and eighty: Inches, Sixty three thousand three hundred and sixty; and Barley Corns, One hundred ninety thousand and eighty.

The Circumference of the Earth and Sea, jointly is 25036 Miles, and the Diameter 7966 Miles, and its Semidiameter 3983 Miles, according to English Mensuration.

The Dimensions of England, and the Adjacent Islands.

The length of England from South to North is 386 Miles, the broadest place from the Lands end to Sandwich, is 279 Miles; the next broadest place, which is between S. Davids and Tarmouth in the East, is 240 Miles; the whole compass of England is 1532 Miles.

The length of Ireland, North & South is 303 Miles, the greatest breadth thereof, East & West, is 112 Miles, the whole compass of the main Land is 948 Miles.

The greatest length of Scotland, South and North, is 480 Miles, and the breadth, East and West, is 165 Miles, the whole compass 1100 Miles.

The Ile of Man is in length 28 Miles, the breadth 18 Miles, and in compass 91 Miles.

The Isle of Anglesey is in length 34 Miles, in breadth 18 Miles, in compass 85 Miles.

The Ile of Wight is in length 22 Miles, in breadth 11 Miles, in compass 57 Miles.

The Ile of Garnsey is in length 13 Miles, in breadth 9 Miles, the whole circumference is 36 Miles.

The Ile of Fersey, in length 10 Miles, in breadth 6 Miles, in compass 28 Miles.

*A Geographical Description of the World;
containing Europe, Asia, Africa, and America.*

Europe contains in it these Provinces, Germany, Sweden, Denmark, Italy, Muscovia, Hungaria, France, Spain, Polonia, Sclavonia, Norway, Græcia. The most eminent Islands are these, Great Britain, Ireland, Sardinia, Candia, Nigropont, and Corsica.

The greatest length of this part of the World, is 3000 Miles, the breadth 900.

Asia, the biggest of the Four, and first known part of the World, contains these principal Regions and Islands, viz. Armenia, Anatolia, Persia, Assyria, China, Syria, Arabia, Mesopotamia, India, Parthia, Media, Palestine, Caldea, Tartaria.

In *Africa* are these Provinces, viz. Egypt, Barbary, Ethiopia, Nubia, Abassines, Alonomotopa, Lybia. The Islands Magdagarde, S. Thomas, Insula de Cape Verde, Insula de Canaria, Insula de Madera.

America the Fourth Part of the World, and of the latest discovery, consisteth of these two Parts, Mexicana, and Peruana.

The Provinces of Mexicana, are Nova Hispania, Terra Florida, Nova Albionia, California, Norimbega, Nova Francia, Estoriland. The cheif Islands of Mexicana, are Greenland, Heland, and Friesland.

The Provinces of Peruana, are Brasil, Pisin de Chibana, Peru de Cartanen, Chila, Charon, Chico, Patagores. The cheif Islands of Peruana, are Hispaniola, Cuba, Jamaica, and many others.

	100	10	01	10	0	3	0	04	10	0	6	0	0		

THe use of this Table is this. If thou wouldst know what the Interest of 100, and 5 pound is, for 9 Moneths, at Six per Cent. then in the first Column find out 100 at the Foot of the Column, and right against it, under the title 9 Moneths (which is the fifth Column) here you shall find 4 l. 10 s. And against the number 5 l. you shall find 4 s. 6 d. So that the Interest of 105 l. for 9 Moneths, cometh to 4 l. 14 s. 6 d. The same of all the rest.

A Compendium of the most remarkable Passages of the Times, from the Creation to this present Year. 1674.

King Charles the Second his happy arri- val at London, May 29. 1660.	14
Two Comets appeared in December and March.	10

The last sad Mortality that followed;
whereof died of the Plague, that were
taken notice of, besides many others,
68596. 9

The most dreadful fire in London, that
followed them, Sept. 2, 3, 4, 5: 8

Beer Measures.						Ale Measures.					
Pints	288	144	72	36	18	9	4	2	1		
Quarts	144	72	36	18	9	4	2	1			
Pottles	72	36	18	9	4	2	1				
Gallons	36	18	9	4	2	1					
Firkins	4	2	1								
Kilderkin	2	1									
Barrel	1										

The use of this Table is thus. There is contained in a
Barrel 288 Pints, in the first row; in a Kilderkin 144
Pints; in a Firkin 72 Pints; in a Gallon 36 Pints; in
a Pottle 18 Pints; in a Quart 9 Pints. Or thus, One Barrel
is two Kilderkins, 4 Firkins, 36 Gallons, 72 Pottles, 144
Quarts, 288 Pints; and so of the rest it is very easie.

Chief Notes of this Year, 1674

Golden Number	English Account	Roman Account

This is the Season for good Hus-
bands to lop and prune superfluous
Branches from Fruit-trees ; Un-
cover their Roots ; set all kind of
Quicksets and Fruit-trees in the
New of the Moon. Be sure the Wind
be not North, nor East ; and set
the same sides to the South & West,
which grew at the first. Set Beans,
Pease, and Parsnips : The Weather
mild, and Moon decreasing, dig
Gardens ; drench weak and sick
Cattie, Kine, with Verjuice, Horses
with Water and Ground Malk, fod-
den with a little Bran.

In this Moneth let not Blood, nor
use Physick, unless necessity constrain
thee ; beware of taking cold, for
Rhumes and Flegm do much increase
this Moneth : Its hurtful to fast long,
to drink White Wine fasting is good :
Use Meats that are moderately hot,
for the best Physick is warm diet, warm
Cloaths, good Fires, and a merry honest
Wife.

This Moneth set, cut, and lay Quicksets and Roses, as all other Plants. Set and Plant Vines, Hops, and all fruit that grows on Bushes. Sow Pease, Beans, and Onions; furnish your Gardens with Sallads and Pot-herbs for Summer. Prune and trim all sorts of Fruit-trees from Moss, Canker, and superfluous Branches. Remove Grafts or young Trees, in the last quarter, the Moon being in *Aries, Libra,* or *Scorpio*.

If necessity urge, you may let Blood, but be sparing in Physick, and be sure when a warm day comes, to prevent taking of cold, through carelessness; for the warm Air this Moneth is not lasting, but oft deceives us to our prejudice.

In this Moneth, Stomy Fish, Milk, and the like, that do opilate, and stop the Liver, and the Veins, and thicken the Blood, are to be eschued as Enemies to Health.

March hath xxxi days.

31	5	18	6	41	

Now advise with the honest and able Astrological Physician; it is good to purge and let Blood, for in this Moneth the Humors and Blood increase, and gross Feeding breedeth gross Blood and Humors; therefore use means of good digestion, and such as afford good Juice and Nutriment to the Body; forbear all things Salt, purge the Blood by Potions, and Blood-letting; sweet Meats and Drinks are commendable.

*In Gardning never this rule for-
get,
To sow dry, and set wet.*

The use of Physick becomes now
seasonable, as also Purging and
Blood letting. It is good to abstain
from Wine; for many Diseases will
be taken thereby, to the ruine of
many.

This Moneth the Pores of the
Body are open, and apt to receive
Physick; therefore this is the best
time to remove, and prevent causes
of sickness, or for speedy remedy in
extremities.

This Moneth commands the pro-
vident Houſwife, and the prudent
Artiſt, to ſet their Skills on work.
In the beginning of the Moneth
ſow and ſet thoſe tender Summer
Herbs that would not endure the
former cold. Weed your Hop Gar-
dens, cut off ſuperfluous Branches.
Moſs Trees and Gardens, and
weed Corn; riſe early, and walk
the Fields and Gardens.

Now every Garden and Hedge
affords thee Food and Phyſick. Riſe
early, walk the Fields by running
ſtreams, the North and Weſt ſides.
Sage and Sweet-Butter, an excel-
lent breakfast. Clarified Whay with
Sage. Scurvy-Graſs, Ale, and
Worm-wood Beer, are whoſom
Drinks. Green Whay excellent
againſt Choler. Eat and drink be-
times in the morning. Abſtain from
Meats that are hot in Nature, and
Salt in Quality.

*Wm. Tho. Blake had of me

At the Full of the Moon, this Moneth and next, gather your Herbs to keep dry for the whole year. Set Rosemary and Gilliflowers, sow Lettice and Radish, three or four days after the Full, and they will not run to Seed. Shear your Sheep the Moon increasing Take heed of cutting Herbs or Flowers with Knife, but rather gather them with your Fingers.

Let honest moderate Labor and Exercise procure your Sweat. Thin and light Diet, and chaste Thoughts, tend to health Lie not unadvisedly on the Ground, or overhastily drink.

Distilling of Roses, and making of Surrups and Conserves are now in prime: Use a light and thin Diet, for the Stomach is weaker now then in the former Moneths; Clarified Whay boiled with cold Herbs, very wholesome.

31	4	35	7	25

Get Rue, Wormwood, and Gall, to strew on your Floors, to destroy Fleas. At the Full Moon gather Flowers and Seeds, dry your Flowers rather in the shade, than in the Sun, which too much exhalet their vertue; but to avoid corruption, let the Suns heat a little visit them,

Beware of violent heat, and sudden cold, which are the great distempers of this Month, and produce pestilential diseases: Forbear superfluous drinking, but eat heartily: Use cold Herbs and Meats, abstain from Physick. Now the Rivers are more wholsom then the Baths. In time of Pestilence keep your Chamber Windows shut till the Sun have force of shining. Perfume your Chamber every morning with Tar upon a Chafing-dish of Coals: Use *Carduus Benedictus* boiled and drank fasting.

xxxix days.

Now with thankfulness reap your
 desired Harvest. Sow Winter
 Herbs in the New of the Moon.
 Esteem fair weather as precious,
 and mispend it not. Gather Garden
 Seeds near the Full. Use moderate
 Diet, forbear to sleep presently after
 meat. Take heed of sudden cold
 after heat.

Beware of Physick and Blood-
 letting in the Dog-days, if the Air
 be hot; otherwise, if occasion re-
 quire, you may safely make use
 thereof. Now moderate Diet is best,
 beware of Surfeits, Heats, and
 Colds, for Plurifies are ingendred
 thereby. Use not to sleep much, e-
 specially in the afternoon, for that
 brings Opilations, Headach, Agues
 and Cathars; and all noxious dis-
 tempers of the same kind. Re-
 Wine and Claret are excellent Re-
 medies for Children against the
 Worms.

September hath xxx days.

The beginning of this Moneth,
 and the end of the former, gather
 Hops, their Complexion being
 brown, and the weather fair, and
 no dew on the ground. Kill Bees,
 make Verjuice, remove and set all
 slips of Flowers, between the two
 Lady days; remove Trees from
 September till February, especially
 in the new of the Moon. The wea-
 ther warm, and the Wind South or
 West, cut Quicksets, gather ripe
 Fruit, Sow Wheat and Rie, Win-
 ter Parsnips and Carrots; and set
 Roses, Strawberries, and Barber-
 ries.

Now as the year declines, pro-
 vide your Winter Garments, hang
 them on loosely, to prevent that you
 might after repent of: Good for
 Physick and Phlebotomy.

October hath xxxi days.

Sow Wheat and Rie, remove young Plants and Trees about the New Moon, observing this as a seasonable Secret, that in setting, you carefully place that side to the South and West, which were so before you took up the Plant; otherwise the cold kills it. Gather your remaining Winter Fruit, set all kinds of Nuts and Acorns, and cut Rose-trees but once in two years, if you intend to have store of Roses.

The Garments you last Moneth, hung on your backs in Jest, now Button them close in good earnest: Cloath you now for prevention, for the Cold comes insensibly, and Fogs oftentimes beget a whole Winters cold. Consult with your Tailors, as well as Physicians.

November hath xxx days.

Of Eclipses this present year. 1674.

There will be Five Eclipses of the *Luminaries* this year, three of the *Sun*, and two of the *Moon*: Those of the *Sun*, will all happen when the *Sun* is under the *Earth*, and so not to be seen of us.

The first of the *Moon* is the 12 of *January*, the beginning before four, the middle half an hour after five, the end half an hour after seven in the morning: The continuance will be above three hours, almost the *Moons* whole body will be dark.

The second of the *Moon* will be the 7 of *July*, three quarters past 8 at night, the beginning at 6 hours 50 minutes at night before she rises, the middle at 3 quarters past 8, the end at 39 minutes after 10 at night; from the beginning to the end, will be 3 hours 48 minutes; the *Moon* will be totally dark above an hour, she will begin to be wholly dark a little before 8, and begin to recover her light about 9, a very great Eclipse.

The Description of the Four Quarters of the Year.

The *Spring* begins this year the 10 of *March*, at 4 of the clock in the Morning, the *Sun* then entering into the first *decuple* of *Aries*, equalising day and night.

The *Summer* Quarter begins eleventh of *June*, at 7 in the forenoon, making to us the longest day, and shortest night in the year.

The *Autumn* Quarter begins, the *Sun* entering the *Equator* in *Libra*, *Sept.* 12 35 m. after 10 a clock at night, making day and night again equal.

The *Winter* Quarter takes beginning the 11 of *December*, at 10 m. after 10 in the forenoon, the *Sun* then entering the *Southern Solstice Capricorne*, making with us the shortest day, and longest night in the year.
